LAUNDRY + MUDROOM CASE STUDY

Reimagine unused front-of-house space into a beautiful and functional laundry and mudroom designed for modern family living.

AT A GLANCE

Scope:
Laundry + Mudroom

Location: Louisville, KY

Key Features:

- Laundry folding space
- Built-in cabinetry
- Mudroom storage
- Garage door relocation
- Improved traffic flow
- Recessed refrigerator
- Guest bath addition
- Custom organizational layout

A picture says a thousand words.
Testimonials, even more.

“The downside of Bailey – if you would call it that – is that you’re likely to be paying a premium for their services. But as with anything else, you get what you pay for. Bailey is a one-stop shop for a remodel, so part of what you’re paying for is certainly the convenience and peace of mind that comes from that.”

PROJECT OVERVIEW

The former dining room had turned into a cluttered playroom, and the laundry lacked storage and flow. Bailey Design + Build reimagined the front of the home into a multi-use laundry and mudroom, relocating the garage entry and repurposing closets to improve the kitchen layout—making the entire first floor more open, organized, and family-ready.

OBJECTIVES

- Create a clean, functional transition zone from garage to kitchen
- Maximize utility with hidden storage and counterspace
- Improve organization and traffic flow across the first floor
- Rework unused spaces to support modern family life

SOLUTIONS

Design Excellence

Repurposed the former dining room into a hardworking mudroom + laundry hub with cabinetry, folding surfaces, and hidden storage. The garage door was relocated into this new space

Function and Flow

Redirecting traffic flow allowed for the kitchen range hood wall to shine as a new focal point and enabled better circulation throughout the home.

Smart Storage

Absorbed a small coat closet to carve out room for a guest bathroom, while also recessing the refrigerator into the wall—gaining back square footage and making room for a larger kitchen island.

Utility + Comfort

Added valuable counterspace for folding and organization in the laundry zone, and resolved venting issues with updated mechanicals. Now the space is not only more beautiful—it actually works.
